DARK PSYCHOLOGY

Malevolent in the intention, the Ipredators habitually deceived others using ICT in the abstract and artificial electronic universe known as cyberspace. Michael Nuccitelli, psy.d. He became interested in psychology and profile of those who use to abuse, steal, mock and victimize others online in 2009. Dr. Nuccitelli has dedicated himself to learning the psychological composition of those who participate in malable activities in line CENTRAL FOR CONSTRUCTION is the premise that the criminals of the Information Era, the deviant and the disturbed violently are the new psychopathological classifications for humanity. As the owner of a Practice of Group Psychology based in New York, Dr. Nuccitelli is an expert in discussing mental illness, psychopathy, interpersonal dynamics, human consciousness and addiction. Dr. Nuccitelli Help Center is an expert in cybernet, cybeling, online deprecation, online cheating, Internet security and Internet addiction. Dark psychology seeks to understand those subjective thoughts, feelings, perceptions and processing systems that lead to predatory behavior that is antithetical to contemporary understandings of human behavior. From the moment we are born until the moment of death, there is a side hidden within us that some have called evil and others have defined as a criminal, diverted or psychopathic.
